New Sales Literature Released

Elcotel is proud to announce the release of new sales literature consisting of a redesigned sales folder, and product sheets for the Series 5, ACP-1, and PAOF. This literature uses concise text and is rich in color photos. It has feature-benefit listings on each product sheet, making for an easy presentation of Elcotel products to your customers. Response has been overwhelmingly favorable to the new "look" that this literature has. Our intention is to replace all old sales literature with this consistent, quality look. In the near future we will be releasing a similar product sheet for the new PNM-2 management program.

Call for quantity pricing and additional details.
