

ELCOTEL[®] ALARM CODES

Below is the list of Alarm Codes generated by an Elcotel[®] board. Because the code designation (whether it is a number or a letter) depends on where you get the alarm information, we have listed both the numeric code you would get from the phone and the letter code that shows up in the management software.

Description	Numeric	Letter
SMDR buffer damaged	1	A
Handset	2	B
Cash box/Vault bypass code	3	C
Program running from ROM	4	D
Rate RAM reload	5	E
Cash box trigger	6	F
