Ascension™ Smartphones, A Step Up

Protel's revolutionary *Ascension* smart payphone boasts that rare feat of combining truly exquisite form with superior function. Rising above the ordinary to reach new heights, *Ascension's* clean lines and ergonomic layout make it the perfect payphone to install at any location. City sidewalks, retail stores, malls, hotel chains, airports, restaurants, convention centers, colleges and hospitals are all potential sites that allow you to reap the benefits of installing *Ascension*.™ Its sleek, sophisticated appearance is the ticket to getting into more locations, as well as keeping existing location owners happy.

Ascension™ is designed for ultimate flexibility. It can be site specific, location specific, account specific or customer specific. This smartphone goes anywhere.

In addition to attracting traditional callers paying with coins, *Ascension's* optional state-of-the-art card readers and data jack encourage use by callers who demand the benefits of the latest technology. Set-based operation eliminates the need for third-party call controllers.

Intuitive operation is expected from today's payphones and that's what is delivered with *Ascension*.™ Icons gently guide users with a minimum of direct instruction. Strategically placed feature buttons allow selection of multiple language voice prompts, receiver volume control and next-call function through visual instructions. Larger, wider spaced keys make dialing easier for everyone, especially those with sight impairment or a limited range of hand motion.

The payphone environment can be harsh. In addition to providing maximum security, the *Ascension's* high strength aluminum casting resists corrosion and will maintain its good looks through a lifetime of hard service. A scratch-resistant, polyester powdercoat finish gives the *Ascension*™ a look to appreciate. O-ring seals resist water to give the *Ascension*™ a long and reliable service life. All of these features translate into more satisfied customers and less windshield time for service technicians.

The *Ascension*™ payphones...rising to a new level of style, flexibility, durability and user satisfaction.

Additional features and description can be found on Protel's *Ascension*™ specification sheet or at www.protelinc.com.

Ascension™ is designed for ultimate flexibility.
